Workplace Behavioral Expectations with Career Exploration Techniques

Prepare students to become lifelong learners & expand career options

Crucial, foundational techniques that students will build upon throughout their professions & lives

An industry-recognized badge is offered through Credly upon successfully passing the WRS Assessment.

Focus on individual aptitude & character strengths

USE AS A TEST PREP

The Level 2 curriculum is correlated to the Workplace Readiness Skills®, backed by national research, but can be customized to cover only the skills you want to teach.

Curriculum and Assessment are based on the same skills.

Member states are offering the assessment as an industry-recognized credential.

Teach the curriculum as a complement to your program.

EMBEDS LIFE & SOCIAL SKILLS IN CAREER EXPLORATION

Life & social skills standards and values create a fundamental link between the adolescent and career choices, and yet these skills are not often taught in schools at this crucial stage in human development. If they are addressed, they are not often taught evenly or adequately. These are the traits that are most closely tied to identity and most useful in successfully determining a pathway into a career.

These skills are always required, but learners must strengthen them throughout their lives.

INSTRUCTION

To support instruction, we offer modules through an LMS that teachers can use to deliver activities and vocabulary, linking them to informational resources, videos and games when appropriate. Activities were created with ease of use in mind. They should be infused into any classroom, regardless of discipline, to thoroughly enrich a student's perspective of career exploration and workplace readiness.

Also a great option for distance learning.

Perfect for
Grades 10-12:
students transitioning
into postsecondary
or
careers

BENEFITS

While students might be trained to be technically-ready to perform their skill set, they often need assistance and guidance to be professionally-ready for any workplace. The CTECS Workplace Readiness Skills (WRS) package from CTECS ensures they are aware of and prepared for the many real-world aspects of their professions.

The WRS package offers an online test, a credential for successful completion, and now, instructional resources & curriculum.
